

Dr. Christos T. Chasapis – Assistant Professor of Organic Chemistry

Dr. Christos T. Chasapis was born in Ioannina, Greece. He received his B.Sc. in Chemistry from the University of Ioannina in 2000 and his M.Sc. in Chemistry from the same Department in 2002, supported by an IKY fellowship. In 2005, he completed his Ph.D. in Chemistry at the University of Ioannina and the CERM (NMR Center) of the University of Florence, as a Marie Curie fellow, under the supervision of Prof. Ivano Bertini.

He has worked at leading research centers in Italy, France, and Germany, as well as at Greek universities and research institutes, including the University of Patras and FORTH/ICE-HT. From 2022 to 2025, he served as a Principal Investigator at the Institute of Chemical Biology of the National Hellenic Research Foundation, and in December 2025 he was elected Assistant Professor of Organic Chemistry at the Department of Chemistry, National and Kapodistrian University of Athens.

His research interests focus on NMR spectroscopy of organic compounds, the study of protein–small molecule and pharmacological agent interactions, as well as molecular docking, molecular dynamics, and computational chemistry approaches. He has participated in numerous European and national research projects (FP7, Horizon 2020, HFRI) and has been awarded fellowships from the Marie Curie program, the Stavros Niarchos Foundation, and IKY.

His scientific work includes more than 85 publications in international peer-reviewed journals (>3,200 citations), as well as the authorship of monographs and books. He has served as a reviewer for international journals, as a member of editorial boards, and as a Guest Editor in special issues of international scientific editions.
